

In this assignment you should also work in groups; make sure that all the members of the group are involved in the work. You should be discussing the two articles, and everyone should proof read the summaries, and contribute to the encryption.

Q1 Write a half a page summary of the article *Cloud Computing* by Brian Hayes.

Q2 Write a half a page summary of the article *Security in the Cloud* by Gary Anthes.

Programming Problem In this assignment you are going to install **GPG** on your machine, download the key of the instructor (**9B070A58**) and encrypt a test file with it, say **test.txt** containing “hello, world”, and submit the result together with the write ups. The file **test.txt** should be “armored”, and the encrypted version should be called **test.txt.asc** .

In short, submit a PDF file containing the writups for Q1 and Q2, and the file **test.txt.asc**
